

GlowUp Marketing Campaign ROI Analysis (2024–2025)

Business Intelligence Report

Business Objectives

Problem Statement : **GlowUp**, a beauty and skincare startup that recently ran multiple **online and offline marketing campaigns**. This analysis aims to identify **which campaigns delivered the best return on investment (ROI)** and how to allocate marketing budgets efficiently in the future.

Campaign Identification

Identify Campaign which generated higher ROIs

Future Marketing Strategies

Recommend budget allocation strategies to increase ROI

Executive Summary

Key Findings

-  Email campaigns are the most effective channel with highest ROI and lowest Cost Per Acquisition
-  Offline event campaigns are net-negative (ROI = -29.06%), dragging overall performance
-  Most influencer campaigns perform well with average ROI of 61.36% and Cost Per Acquisition less than overall cost per acquisition
-  Social Media campaigns are underperforming with low ROI (25.66%) and lowest conversion rate
-  Event Campaigns have higher conversion rate due to in person audience whereas Influencer and Social Media Campaigns affected by passive scrolling behaviour, reducing conversion intent

 **Caveats:** ROI excludes COGS/gross margin; last-click attribution used; Events may have brand-building value not captured here.

Dataset Overview

About the Data

This analysis is based on a Marketing Campaign dataset from GlowUp a beauty and skincare startup. The dataset captures campaign details such as start date, end date, channel, impressions, clicks, amount spend on campaigns for 12 months period.

 **Time Period:** July 2024 – July 2025

 **Records:** 40 campaigns

 **Attributes:** 11 columns

 **Campaigns channels:** 4 (Email, Events, Influencer, Social Media)

Approach: Data cleaning → EDA → KPI analysis → Insights → Strategic recommendations

Tools : Power BI

Assumptions:

- Data is only available for the **last 12 months**.
- ROI is calculated as $(\text{Revenue} - \text{Spend}) / \text{Spend} \times 100$.
- **Data Cleaning Applied:** Missing Clicks/Impressions in 10 Event campaigns imputed as 0 (offline channel); 3 digital campaigns imputed with channel median.
- Synthetic data — real-world validation required

Key performance Indicators

Cost Per Acquisition

Email campaigns – The Winner.

Total Revenue By Channel

Return On Investment by Channel

Cost per Acquisition by Channel

Email campaigns returns more than 270%!!!

- Email channel is the Low cost high return campaign channel
- Maintain the quality and content of the Email campaign and increase investment by 10% to increase overall revenue by 1%

Offline events drags ROI down

- Cost per acquisition of offline events is more than two times the overall cost per acquisition
- Evaluate the offline events content, location etc and improve it. Eliminate bottom 20% events and reduce budget of the remaining.

Influencer Marketing -low cost moderate return

- Cost per acquisition of Influencer Marketing is less than overall cost per acquisition and ROI is more than two times the overall ROI
- Identify underperforming Social Media Campaigns and reduce budget by 20-25% to increase ROI by 4-5%

All Email Campaigns > Rest of Campaigns in every channel

Key Insights and Recommendations

Black Friday Email campaign is the best campaign with more than 400% return on investments whereas Monsoon Email Campaign also returns more than 180%.

Campaign by Youtuber Anaya and Micro influencers tops the influencer channel with more than 75%

Maintain the quality and content of all Email campaigns since all campaign returns high revenue. Keep the budget allocated for all email campaigns

Get rid of BeautyGuru Live Campaign as it is lowest among the influence campaigns and allocate it's budget for top performing influencer campaigns to increase Influencer Campaign ROI by 4-5%

All event campaigns are at loss!!!

Key Insights and Recommendations

Some Instagram campaigns such as DiwaliGlow and SummerGlow are performing well with good return on investments, 75.5% and 44%, respectively

Every offline events conducted at major cities suffer a loss in a range of -15% to -36.35% with Delhi event being the best among the worst

Maintain the quality and content of well performing Social Media campaigns, however cut the budget of underperforming Social Media campaigns with ROI less than 20%, by 20% and allocate it to top performing influencer campaigns to increase overall ROI by 2-3%

Examine the factors which increased the spending on offline events and take necessary actions to reduce it by up to 20%, thereby increase ROI by 2-3%

Get rid of events at cities except Delhi, Mumbai and Pune because of loss greater than 25%. Investigate the content of offline event campaigns and improve it to increase conversion rate thereby increasing ROI.

Conversion Rate is lower in Social Media and Influencer Marketing Campaigns

Conversion Rate by Channel

Conversion Rate(Social Media)

Conversion Rate(Influencer)

- Conversion rate is highest in **Email campaigns** whereas **Event campaigns** also converts **more than 12%** of total leads
- Every Social Media campaigns has conversion rate less than overall conversion rate (8.61%), whereas for Influencer campaigns, there are **three campaigns which performs above average in terms of conversion rate**.
- Low conversion rate in Social Media and Influencer Campaigns is largely contributed by **passive scrolling pattern of the users along with excessive volume of similar campaigns by competitors**
- Collaborate with **more popular, influencing celebrities** with **enhanced and creative contents** to engage more users through social media and influencer campaigns

Fourth quarter is the highest revenue generator

Key Insights and Recommendations

-  Festive seasons like Diwali, Christmas and New Year have generated highest revenue across the 12 months period from all channels except Offline Event campaigns. October 2024 is the best month in terms of ROI.
-  While Email delivers the highest ROI, Influencer and Social Media drive the highest absolute revenue due to larger budgets
-  Q4 Revenue is 32% of total revenue, Spend is 30% of total spend and average ROI is 42% which is greater than overall ROI. ROI is boosted by festive demand despite front-loaded budget
-  Launch exclusive campaigns in collaboration with affordable celebrities on festive seasons especially in Quarter 4 (October, November and December) to increase revenue by 5-10%

Strategic Recommendations

Quick Wins

- Get rid of majority of the offline events which are at loss and reallocate their budget for Influencer and Social Media festive season campaigns to increase ROI by 3-5%
- Blackfriday Email campaign is the best in terms of ROI and Conversion rate. So, launch campaigns on other channels with exiting offers during Black Friday to increase ROI by 2-4%
- Identify the factors causing higher spend for offline event campaigns (Location, Transportation etc) and take necessary actions to bring it down by 10-20% thereby increasing ROI by up to 5%.

Long term Strategy

- Social Media campaigns has lowest conversion rate and average ROI. So redesign the content and visuals of campaigns to increase conversion rate, thereby increase ROI.
- Consistently identify the trends in social media and collaborate with viral influencer/social media stars to launch campaigns to increase conversion rate by up to 5%
- Reduce budget of the underperforming campaigns by 20% and allocate it to well performing campaigns to increase overall ROI by up to 5%

Recommended Budget Reallocation (Next Quarter)

Channel	Current Spend	Current Revenue	New Spend	New Revenue (Projected)	ROI Change
Email	₹0.1M	₹0.35M	₹0.2M	₹0.55M	+57%
Social Media	₹0.9M	₹1.1M	₹1.1M	₹1.38M	25.5%
Event	₹1.6M	₹1.1M	₹1M	₹0.71M	-35.5%
Influencer	₹2.3M	₹3.74M	₹2.6M	₹4.18M	11.8%
Total	₹4.88M	₹6.3M	₹4.88M	₹6.83M	+8% ROI

Expected Business Impact

 Identified well performing campaigns with higher ROIs such as every Email Campaigns and most of the Influencer Campaigns

 By reducing budget of underperforming influencer and social media campaigns by 20% and allocating them to well performing campaigns, **Projected annual ROI uplift: 29.58% → 34–37%**
= ***additional ₹0.24–0.36M in profit on the same budget.***

 Redesigned social media and influencer campaigns with association of popular celebrities, increased conversion rate: **8.61% → 11–12%**

Thank You
